## ULTRA-COMFORTABLE AND ERGONOMIC LABORATORY CHAIRS

Promotal has reinvented its laboratory chairs and offers you a new, more comfortable and ergonomic model.

Our laboratory chair adapts perfectly to all morphologies thanks to 4 possible settings: seat height, backrest angle, backrest depth and backrest height. The chair features high-density moulded foam seat filling and footrest option (item number 927) for increased comfort. Hand control has also evolved compared to older models: it is now flat and no longer cylindrical, for increased robustness and more intuitive use.

Thanks to a seamless, antibacterial M1 fire-retardant covering, this laboratory chair is very easy to clean for guaranteed hygiene. The 5-branch base (Ø 60 cm) ensures the chair is stable and safe to use. Made in France, the laboratory chair has a patient weight capacity of up to 135 kg.

All you have to do is choose the model: on base or wheels and according to the desired height.

Ultra-comfortable and ergonomic are the cornerstones of Promotal laboratory chairs.

Choose from 4 models: on a base or wheels and according to the desired height.
